CALL CENTER BILL!

On June 5th, our Legislative and Political action team representative, Susan Fleming, was in our State capital along with CWA to show support for the Call Center Bill. This bill is very important to our call centers in New York State.

The bill will ensure that companies in New York who relocate 30% of call volume in a year to other states or outside the US would have to give one hundred days notice. Companies failing to do this would be fined and will be added to a list. Once a company is on to this list, they will no longer qualify for any State funding, grants, or low cost loans. Getting this bill passed is very important and crucial to our jobs. This would mean any company receiving a tax break of any kind from New York must keep work in New York!! It is important that all of us make our voices heard and reach out to your local Senator to let them know WE ALL need their support in passing this very important bill. We will be sending links for you to say "AYE" for this bill and send an email to your local Senator via Facebook and Twitter. You can also visit www.nysenate.gov and search for Call Center Bill S1804A.
