NY Call Center Jobs Act

Last week we all received an email from our Business Manager Barb Carson about the NY Call Center Jobs Act passing in the New York State Assembly. This bill, once signed into law, will make it very difficult for companies in New York to move call center work to foreign countries and other states. This is a step in the right direction to ensure job security for our call

center jobs. Your COPE contributions (Committee on Political Education) allowed the committee to, send letters and emails, signed petitions, attend rallies and press conferences and go to Albany to speak with legislators in support of this bill.

Amendment to Labor Law!

June 21st, 2019 the NY State Legislature passed a bill that will allow striking workers to be eligible for unemployment benefits after one week instead of seven.

Have a safe and happy 4th of July!!!
